

CEWELD 4539 Ti

TYPE	Rutile basic electrode for welding Cr-Ni-Mo-Cu steels with very low C-content.																		
APPLICATIONS	<p>CEWELD® 4539 Ti is designed for joining exceptional corrosion resistant CrNiMoCu- steels at temperatures to 350 °C.</p> <p>Used in highly corrosive environments encountered in e.g. sulfur and phosphorus production, pulp & paper industry, fl ue gas desulfurization plants; desalination plants, fertilizer production and petrochemical industry; acetic and formic acid production, in pickling plants as well as heat exchangers and power plants using brackish or seawater.</p>																		
PROPERTIES	The weld deposit from CEWELD® 4539 Ti offers excellent corrosion resistance especially against Phosphor acid. The weld deposit is capable of taking a high polish
