

# CEWELD E NiFe 60/40 K

**certilas**® THE FILLER METAL SPECIALIST

TYPE	Special coated electrode with copper coated core wire for welding cast iron with high tensile strength.
APPLICATIONS	CEWELD E NiFe 60/40 K is suitable for welding grey and malleable cast iron, equally suitable for SG iron. Use this type in case a high tensile strength is required and due to the special coating to weld in difficult welding positions.
PROPRIÉTÉS	CEWELD E NiFe 60/40 K has a few benefits compare to other "FeNi" types because of improvements, such as: weldable with very low current, copper coated core wire and a powerful arc at very low amps. Preheating is normally done to slow down the cooling speed, in case you can not control the cooling speed it is better to keep the work peace at a low temperature during welding and hammer immediately after welding.

CLASSIFICATION	AWS	A 5.15: E NiFe-CI
	EN ISO	1071: E C NiFe-CI
