

CEWELD SA S275 strip

TYPE	Low alloyed steel strip for Submerged and ESW welding
TOEPASSINGEN	SA S275 can be used for cladding and build up layers before hardfacing or corrosion resistant stainless steel or Nickel based layers.
EIGENSCHAPPEN	Excellent weldability in combination with FL 860 ESHC with high welding speed and deposition rate. The weld seam shows a fine rippled surface free from inclusions and undercut.
CLASSIFICATIE	
GESCHIKT VOOR	Buffer and build up layers prior to hardfacing and or build up layers prior to corrosion resistant stainless steel and Nickel based layers.
GOEDKEURINGEN	
LASPOSITIES	
MECHANISCHE WAARDEN	
HERDROGEN	Not required
